The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 11/607,177	Applicant(s) SEWARD ET AL.	
	Examiner Catherine N. Witczak	Art Unit 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 December 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Nikol et al (“Needle injection catheter delivery of the gene for an antibacterial agent inhibits neointimal formation.” Gene Therapy (1996) 6, 737-748).

Nikol et al disclose on page 744, column 2 a method for distributing a gene therapy agent in the adventitial tissue comprising positioning a microneedle through the wall of a coronary blood vessel so that an aperture of the microneedle is positioned in a perivascular space, and delivering an amount of between 10uL to 500 uL of agent into the space.

Nikol et al do not expressly disclose that the agent distributes longitudinally along the blood vessel, distributes into regions of the adventitia surrounding other blood vessels, distributes transmurally back into the intima, and that the concentration of agent at a location spaced 2 cm longitudinally for the delivery site is at least 10% of the concentration at the delivery site. However, since Nikol et al disclose the identical method as disclosed by the Applicant, it would be inherent that the agent would also provide the same distribution characteristics as claimed by the Applicant.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-25 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of copending Application No. 11/606166; 11/607167; 11/607168; 11/607169; 11/607170; 11/607172; 11/607175; 11/607176; 11/601290; 11/607178; 11/607355; 11/607356; 10/350314; 10/728186; 10/829905; 10/930711; 11/365309; and 11/607658. Although the conflicting claims are not identical, they are not patentably distinct from each other because they disclose the same method, changing only the drug being delivered.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
